ANIELA GOVADA

PROFILE

I am a current student at Utah Valley University. I am working towards my major in Web Design and Development. My concentration is on Application Development. I also hold an Associates of Science with in my major.

EXPERIENCE

INVENTORY CLERK, THE CORNER GROCERY; MURRAY, UTAH - 2021 SUMMER

I worked part time as a inventory clerk in the summer of 2021. During that time I managed and logged inventory. With an already existing system, I updated it with the newer products that we got. Was able to make a real impact on the store as it was established in the beginning of the year. Both my managers were happy with the work I had done in the time I spent there.

DITTO SCREEN SHARING PROJECT INTERNSHIP; UVU OREM, UTAH - 2021 FALL-2022 SPRING

Tested out the screen sharing and the digital signage software at Ditto. Ran through multiple scenarios and documented data on the findings. The overall project helped Ditto to visualize how well their software performed and what more they can add. Worked alongside my project partner and my professor.

DESKTOP SERVICES COORDINATOR; MURRAY, UTAH - 2022 SPRING - CURRENTLY

Work with the Desktop Service team to insure that employees have the right equipment to work and help the customers. I also do software check as well as help with IT problems as they come. Also do inventory checks on the equipment needed for remote employees as well as in-office employees.

EDUCATION

UTAH VALLEY UNIVERSITY, OREM, UTAH | WEB DESIGN AND DEVELOPMENT
2018-2023

SKILL SET

❖ Python

Python was the first coding language that I learned. It is my favorite coding program and have done several projects including a way to calculate how time it takes to sort an array using bubble sort, insertion sort, and merge sort.

❖ JavaScript

JavaScript is what I am currently working on with projects that require me to split an array and grab information from it. As well as print out the specific information and print it out for the user to see.

❖ HTML/CSS/SCSS

Working with HTML is very interesting. I gained a lot of experience with projects that I would do for my classes in HTML and would constantly be learning new things. I have designed many webpages using HTML and CSS along with a little bit of BOOTSTRAP.

These are some of the other coding languages and software programs that I know:

❖ C++

❖ UNIX

❖ SQL

❖ Adobe Creative Cloud

I also have good communication skills and do very well when given small leadership roles. I enjoy learning new things to grow my skill as a developer and am very open to meeting new people and working in groups.
